Kevin Hogan

QB Stanford Rs. Sr.
Height: 6'3" Weight: 218 Arms: 33.5" Hands: 10"

Combine: **40 yd Dash**: 4.78 **3 Cone:** 6.90 **Vert:** 32.5"

Pros:	**Cons:**
- Thickly built, strong QB, mobile as well	- Bit of a windup in throw
- Quick release despite windup	- Footwork is a bit erratic
- Makes everyone around him better	- Arm strength is average
- Winner	- Base gets too wide
- Gritty QB who is ultra-tough	- Doesn't transfer weight on throws
- Good manipulating the pocket	- No finesse to his game, chucks the ball
- Keeps eyes down field	- Accuracy issues due to footwork
- Can throw from multiple platforms	

The flaws in Kevin Hogan's game are obvious if you know what to look for. He's got a windup style delivery that NFL teams hate and his footwork is very poor. Hogan has a tendency to balance his weight in the middle of his stride instead of having it on his back foot, ready to transfer forward (proper mechanics). This weight transfer is where real quarterback arm strength and accuracy comes from. When Hogan keeps his weight balanced that's called 'no man's land'. Hogan spends way too much time in no man's land. Despite that, Hogan has developed into an accurate quarterback. He's not as accurate as some of his other counterparts, but his style is to simply get the job done. There's no finesse to Hogan's game. He's a tough, grinding quarterback who isn't afraid of anything on the football field. He does a great job manipulating the pocket and sensing pressure. He's smart, a leader, and a winner. While he's not perfect there are far too few quarterbacks who can excel under pressure and in pressure situations like Hogan. Hogan is the kind of player you have to believe in if you draft him. Late round draft pick who might surprise more teams than expected.
